

Wastewater Holding Tanks

Customizable for Commercial or Industrial Uses

Holding tanks are used in commercial and industrial wastewater services where the wastewater is detained for periodic removal by a vacuum pump service company due to various reasons including the constituents within the wastewater or availability of wastewater treatment facilities. Wastewater holding tanks are available in several materials for use in a variety of applications and can be customized to meet design requirements. Tanks are available for installation both above and below ground in multiple configurations and orientations.

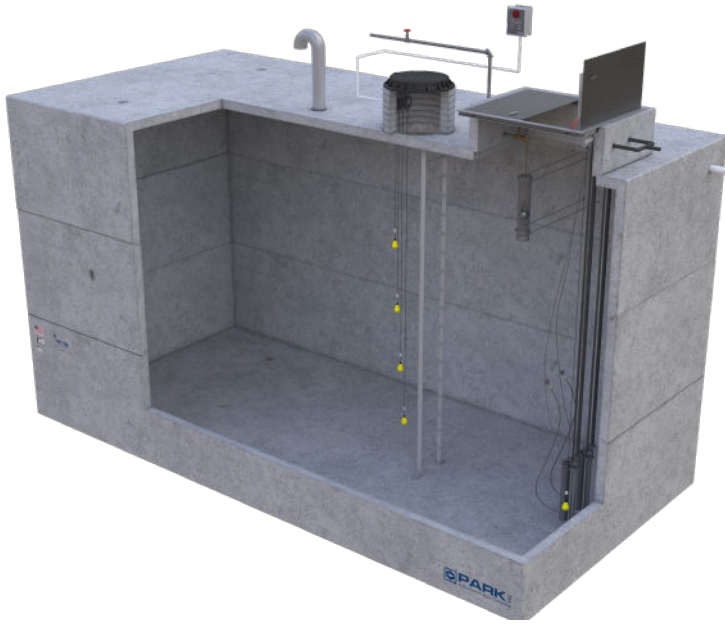

Applications

Industrial facilities • Commercial • Manufacturing

Advantages

- Concrete, steel, or fiberglass construction available
- Rectangular or horizontal/vertical cylinder configurations
- Suitable for above-ground or buried placement
- HDPE, epoxy, and bitumastic interior liner options
- Prepackaged system for easy specification and installation
- Optional pH, temperature, and data logging control systems
- Pedestrian, traffic, and aircraft rated manway and hatchway covers available.
- Maintenance notification system alerts of tank full capacity
- Optional dual wall containment
- Optional metering pump and controls

How It Works

Wastewater holding tanks can be installed in-line with a sewer system, off-line for storage applications, or within a self-contained fluid recycling system for many applications. Leak detection, level detection, pH, and temperature, sensors are available for remote status monitoring. Primary tank materials include concrete, steel, and fiberglass with several interior and exterior liners available for superior performance.

System Components

Tank: Concrete, steel, or fiberglass structures available in rectangular or cylindrical shapes.

Liners: HDPE, stainless steel, epoxy, and bitumastic interior and exterior liners available.

Monitoring: Leak detection, level detection, pH/temperature, and data logging control systems available.

Hatchways: Pedestrian-, traffic-, and aircraft-rated manway and hatchway covers.
